

cool technology for PRODUCTION • PLAYBACK • STREAMING

Lecture and Presentation Recording & Streaming System

Every seat in the house is a front row seat!

TalkingPoints captures and streams live presentations using up to three PTZ cameras. It uses HD Picture-in-Picture formatting to display PowerPoint, Keynote and similar graphics ... and two independent windows for the presenter and panelists. NO camera operators required!

User Interface

File & Display Output

1920 x 1080

A third camera can be used to capture Q&A audience participation during and after the presentation. Copy your session files to DVDs, USBs, and/or upload for VOD.
