

VDEPO™

VIDEO DEPOSITION RECORDING SYSTEM

- 4 x HDMI INPUTS
- 12 PiP LAYOUTS
- FILE BROWSER
- CLIP/GRAPHICS PLAYER
- INPUT PREVIEW WINDOWS
- RECORD PGM & INPUT ISO

VDEPO was created specifically to meet the needs of individuals and companies specializing in the production of video depositions. It is lightweight (9 pounds) and small (11" x 9.5" x 6.5"), designed for quick and easy setup and operation, and it's virtually noiseless.

It has four HDMI inputs to accommodate multiple sources during testimony. It includes a small, high-resolution 15.6" touch screen monitor with built-in prop stand, so you can set the VDEPO chassis at your feet and have only the monitor on the table.

When you start a new session, choose from 12 layouts for PiP (Picture-in-Picture) display for the deponent's camera. Move and resize that window in real-time during a session. Just enter the deponent's name, click Save, and your session will begin.

Simple Touch Screen Interface

The interface is large and intuitive, with on-screen monitoring of up to four sources. These typically include the deponent camera, a tabletop document camera, and one or two laptops or tablet computers.

The deponent camera always appears in the PiP window unless you click Input 1. Then the deponent camera goes full screen, hiding the PiP window. Click any other input and that becomes the full screen background image, and the deponent's PiP window reappears.

File Browser with Preview Window

Audio Mixer Controls

The File Browser and PREVIEW window let you search for, select and display both CLIPS and DOCUMENTS before showing them on-screen. Use the full-text search engine to quickly locate files by key words. You can even monitor clip audio by headphones and cue to a particular part of the clip before showing it on-screen. This powerful functionality saves lots of time by minimizing the need for introducing evidence using cumbersome external devices.

VDEPO™

VIDEO DEPOSITION RECORDING SYSTEM

BASIC SYSTEM CONFIGURATION

- Portable Mini-ITX Chassis with Handle
Keyboard and mouse
Z370I i7-8700K 16GB 1TB SSD
